Starting from the fact that transport and logistics represent one of the key factors for the development of trade exchange of a country, and in this way stimulation of the economic development and connection with the global economic trends, it has been asserted the need to organize a specialized fair where companies from this sector have an exclusive opportunity for their presentation, promotion and direct contacts with the wider business community.

The **Transport and Logistics 2011** fair offers a unique opportunity for:

- perception of the conditions in the transport and logistics area
- what challenges this industry faces with
- what direction the market trends move to
- the place of the Macedonian logistics within the international arena
